

Chapter 17 GUI Components

MVHS note, our Java class has not dealt with ItemEvents

Section 17.2 Events for JCheckBox, JRadioButton, and JTextField

1. Clicking a JButton object generates _____ events.

- a. ActionEvent
- b. ItemEvent
- c. ComponentEvent
- d. ContainerEvent

check all that apply

2. Clicking a JCheckBox object generates _____ events.

- a. ActionEvent
- b. ItemEvent
- c. ComponentEvent
- d. ContainerEvent

check all that apply

15. Clicking a JRadioButton generates _____ events.

- a. ActionEvent
- b. ItemEvent
- c. ComponentEvent
- d. ContainerEvent

check all that apply

16. Pressing the Enter key on a JTextField generates _____ events.

- a. ActionEvent
- b. ItemEvent
- c. ComponentEvent
- d. ContainerEvent

Section 17.3 Text Areas

25. The method _____ appends a string s into the text area jta.

- a. jta.setText(s)
- b. jta.appendText(s)
- c. jta.append(s)
- d. jta.insertText(s)

26. Which of the following statements are true?

- a. You can specify a horizontal text alignment in a text area.
- b. You can specify the number of columns in a text area.
- c. You can disable editing on a text area.
- d. You can create a text field with a specified text area.

27. To wrap a line in a text area jta, invoke _____.

- a. jta.setLineWrap(false)
- b. jta.setLineWrap(true)
- c. jta.WrapLine()
- d. jta.wrapText()

28. To wrap a line in a text area jta on words, invoke _____.

- a. jta.setWrapStyleWord(false)
- b. jta.setWrapStyleWord(true)
- c. jta.wrapStyleWord()
- d. jta.wrapWord()

29. The method _____ adds a text area jta to a scrollpane jScrollPane.

- a. jScrollPane.add(jta)
- b. jScrollPane.insert(jta)
- c. jScrollPane.addItem(jta)

d. None of the above.

Section 17.4 Combo Boxes

30. How many items can be added into a JComboBox object?

- a. 0
- b. 1
- c. 2
- d. Unlimited

31. How many items can be selected from a JComboBox object at a time?

- a. 0
- b. 1
- c. 2
- d. Unlimited

32. _____ returns the selected item on a JComboBox jcbo.

- a. jcbo.getSelectedIndex()
- b. jcbo.getSelectedItem()
- c. jcbo.getSelectedIndices()
- d. jcbo.getSelectedItems()

33. The method _____ adds an item s into a JComboBox jcbo.

- a. jcbo.add(s)
- b. jcbo.addChoice(s)
- c. jcbo.addItem(s)
- d. jcbo.addObject(s).

check all that apply

34. Clicking a JComboBox object always generates _____ events.

- a. ActionEvent
- b. ItemEvent
- c. MouseEvent
- d. KeyEvent
- e. WindowEvent

35. Clicking a JComboBox object generates an ItemEvent event,

- a. if an item is selected.
- b. if a new item is selected.

Section 17.5 Lists

36. _____ is a component that enables the user to choose a single value or multiple values.

- a. A text field
- b. A combo box
- c. A list
- d. A label

37. _____ allows selections of multiple contiguous items without restrictions,

- a. Single selection
- b. Single-interval selection
- c. Multiple-interval selection
- d. Default selection

38. _____ sets the background of the selected item in list jlst to yellow.

- a. jlst.setBackground(Color.YELLOW)
- b. jlst.setSelectedBackground(Color.YELLOW)
- c. jlst.setSelectionBackground(Color.YELLOW)
- d. jlst.setSelectionbackground(Color.YELLOW)

39. Clicking a JList object generates _____ events.
- a. ActionEvent and ItemEvent
 - b. ItemEvent and ComponentEvent
 - c. ComponentEvent and ContainerEvent
 - d. ActionEvent and ContainerEvent

check all that apply

Section 17.6 Scroll Bars

40. Which of the following statements are true?
- a. Every Swing GUI component has a default constructor.
 - b. You can create a scroll bar by specifying its orientation.
 - c. JScrollBar fires an ActionEvent.
 - d. JScrollBar fires an AdjustmentEvent.
 - e. A listener of a JScrollBar must implement AdjustmentEvent and the adjustmentValueChanged method.

check all that apply

41. The following are properties of a JScrollBar.

- a. minimum
- b. maximum
- c. orientation
- d. visibleAmount

check all that apply

Section 17.7 Sliders

42. Which of the following statements are true?
- a. You can create a JSlider bar by specifying its orientation.
 - b. JSlider fires an ActionEvent.
 - c. JSlider fires an AdjustmentEvent.
 - d. JSlider fires a javax.swing.event.ChangeEvent.
 - e. A listener of a JSlider must implement ChangeEvent and the stateChanged method.

check all that apply

43. The following are properties of a JSlider.

- a. minimum
- b. maximum
- c. orientation
- d. visibleAmount
